

The New York State Department of Health-AIDS Institute Oral Health Regional Resource Center in collaboration with the NY/NJ AETC would like to offer you a unique chance to participate in an HIV Oral Health Preceptorship/Mini-Residency.

HIV Oral Health Preceptorships/Mini-Residencies are available for dentists or dental hygienists. These programs are individually tailored to the needs, interests and experience-level of the individual provider. Typical training sessions are one to two days but can be extended. Tuition for the preceptorships/mini-residencies is fully covered by a grant from Health Resource and Service Administration (HRSA) and continuing education credits are available from the American Dental Association and the Dental Hygiene Association of the State of NY.

If you would like further information regarding this program or to register for it, please contact Howard Lavigne, Deputy Director of HIV Clinical Education for the NYS Department of Health-AIDS Institute at 315-477-8479 or HEL01@health.state.ny.us Participant slots are limited so don't wait.
